

Telegraphic Address—
BARR, COVENT GARDEN, LONDON.

AUTUMN 1899.

BARR'S Gold Medal DAFFODILS.

BARR'S DAFFODILS have been awarded 11 Gold Medals, 28 Silver-Gilt Medals, 133 Silver Medals, and 3 Silver Cups, in addition to many Special Prizes, Bronze Medals, Certificates of Merit, &c.

THE RARE AND BEAUTIFUL WHITE CYCLAMEN-FLOWERED DAFFODIL FROM THE
GLENNAN ISLES (N. TRIANDRUS CALATHINUS). See page 21.

BARR & SONS,
12 & 13 King Street, Covent Garden, London.

Nurseries—LONG DITTON, SURREY, a few minutes from Surbiton Station (S.W.R.) Visitors invited to the Nurseries during Spring, Summer, and Autumn to see BARR'S FAMOUS DAFFODILS, IRISES, PEONIES, SUNFLOWERS, MICHAELMAS DAISIES, and other HARDY HERBACEOUS, ALPINE, and BULBOUS PLANTS. The Rock Gardens and Stream are worth a visit.

Entered at Stationers' Hall

BARR'S DAFFODILS.

THE FAVOURITE HARDY FLOWERS OF SPRING.

N. JOHNSTON
QUEEN OF SPAIN.

DAFFODILS are the most graceful and beautiful of all Hardy Spring Garden Flowers, and withstand uninjured our severest winters better than any other flower. The cut blooms are always acceptable, and are in abundance out of doors at a season when other flowers are scarce. They supplement and associate admirably with hot-house flowers.

BARR'S DAFFODILS have been Awarded A MULTITUDE OF MEDALS (Gold, Silver-Gilt, and Silver), PRIZES AND CERTIFICATES, including the only GOLD MEDAL of the first Great Daffodil Conference of the Royal Horticultural Society, the GOLD MEDAL at the Wolverhampton Spring Show, 1896, and the GOLD MEDAL at the Wisbech Spring Show, 1899.

Numerous AWARDS and FIRST-CLASS CERTIFICATES have also been given to individual varieties.

PRESS NOTICES OF BARR'S DAFFODILS, 1899.

Extract from 'The Daily News,' April 29, 1899.

'THE WORLD OF FLOWERS—AMONG THE DAFFODILS.'

'If you happen to go, by the London and South Western, down into Surrey, you pass almost immediately after leaving Surbiton a tract of land lying on your left, which causes you momentarily to doubt your own senses. Out of the sober green of the fields there flash upon you suddenly masses of such vivid glorious colours as you have never seen unless you have walked, at Easter-time, through Haarlem bulb-grounds or through Leyden tulip-gardens. For once the rate of speed on the L. and S.W. seems unnecessarily great. Before you have realised that you were in sight of the most famous daffodil grounds in the world, you are rumbling along again through neat green unexciting fields. But from Waterloo to Long Ditton is only half-an-hour's journey, and that Londoner is a wise man, or woman, who makes a point, during the next fortnight, of paying a special visit to the grounds of Messrs. Peter Barr & Sons. It is to Mr. Peter Barr that the name of Daffodil King was given, many years ago, by horticulturists, professional and amateur, for it is he who saw the wondrous beauty of the flower long before aesthetes and artists had made it fashionable, and when as yet only a few enthusiasts grew it somewhat shyly, and talked of it a little apologetically. Mr. Barr, year after year, climbed about the wilds of Spain, finding new daffodils on the slopes of the Pyrenees, and in the corners of Castille and other provinces where even now the foot of tourist has never trod. At the age of over seventy he set out, a year or two ago, for one of these exploring tours, and if he were not just now on a tour round the world, the Daffodil King would no doubt be in Spain, adding yet more recruits to that splendid légion d'honneur of his, which forms the finest part of his Daffodil army. Thus, after a lifetime among the bulbs, Mr. Barr has succeeded in bringing together the magnificent collection of some 600 varieties of daffodils. Go to Long Ditton and see them, that is the best advice to give to any one who would see one of the most magnificent sights which can be seen at present in and about London.

'As you catch the first glimpse of the grounds that seem to stretch for miles into the distance, you almost gasp. You had not realised that there were so many daffodils in the world, and here they are, in one corner of suburban London, flowing like a stream of gold, down, down, down, to Heaven knows where. Occasionally a great island of crimson, and flame-colour, and rose-pink, and creamy white interrupts this stream. These islands are the early tulips. There, under the shelter of the high bank, lies a square as of blue velvet; the grape-hyacinths are in full bloom. Then a stretch of cool, green tulip foliage; beyond, bed after bed of polyanthus, glowing like jewels. And after that, the daffodils. I am

under orders not to go into dithyrambies, nor to quote Wordsworth. These are cruel orders. Perhaps the next best thing is to quote Mr. Barr, jun., the guide through the daffodils.

"How many bulbs are there in the ground, here?" you ask, wondering if figures can express the prose aspect of these waves and billows of innocent gold. "I could hardly tell," says Mr. Barr; "at all events, some millions. There are 20,000 bulbs in this bed." Ye gods! And "this bed" is but a drop in the daffodil stream!

"Turn your attention to the individual flower. You never saw such daffodils. . . . These before you, in the 20,000 bed, are monsters for size, and marvels for loveliness of tint. "That is the Emperor," Mr. Barr tells you, "and is one of the finest of the trumpeters." . . .

"We wander on to another little bed of scores of thousands. This time the splendid yellows are toned down, the gold of the trumpet is a little paler, the tints of the perianth are shaded from pale gold to silver. "This is a new bicolor narcissus," is the explanation. "It is the VICTORIA, and only came into the market in Jubilee year. Hence its name." There is a dainty beauty, a kind of dream-daffodil, in shades of velvety gold and silver, a MADAME DE GRAEFF; a tiny, delicate cup of almost transparently clear yellow, QUEEN OF SPAIN; then, again, a splendid flower of various shades of gold named P. R. BARR; and score upon score of others each lovelier than all the rest. It is no use trying to picture up in mere words the perfect form of the silvery white SWAN'S NECK DAFFODIL, the BARRII CONSPICUUS, with its cup brimming over with burnished gold; the fragrance of the ODORUS RUGULOSUS, three twinkling stars growing on one stalk. The number of names becomes confusing, and you clutch, with somewhat of relief, at the three pretty double daffodils which the voice of the people (in prehistoric times, of course, for we would never have the genius of inventing names of such classic simplicity) dubbed respectively BUTTER AND EGGS, EGGS AND BACON, and CODLINS AND CREAM.

"Are there still single bulbs which, for their cost, remind you of the times when fortunes were paid for a rare bulb?" "Not exactly. We have a daffodil, the MONARCH, a large golden yellow trumpeter, which we sell at £15. 15s. a bulb. Who buys such? Why, enthusiasts. The cheapest daffodil is the NARCISSUS PRINCEPS, a fine early Irish flower; it sells at £1. 10s. the thousand."

"The show of daffodils, it may be noted, begins when, early in February, two small "trumpeters" begin to blow, and goes on till, in the middle of May, the PHEASANT'S EYE twinkles upon the early summer flowers. It is a pageant of great beauty all the time, but most beautiful at the end of April, when more shades of yellow than our philosophy dreams of are sported by the daffodils. And the best place, all the world over, to see a complete collection is in the grounds of Messrs. Barr & Sons, which are open to all comers, down at Long Ditton, Surrey."

Extract from 'The Saturday Review,' April 29, 1899.

'DAFFODILLIA.'

"From the dim ages, when all that flourished in the land were Lent-lilies and the Poet's Daffodil, to this year of grace 1899—from the cottage-gardens with their "Codlins and Cream" to that veritable *Paradisiis Narcissorum*, Messrs. Barr's nurseries at Long Ditton, is a far cry. As the trains run out beyond Surbiton, the eyes of every traveller must have been caught and enchained by those stretches of white, and sulphur, and gold that cover the land on his left, now glistening in the sun, now subdued into a pearl and primrose mist over the earth at twilight. Unsatisfied with a mere passing impression of all this beauty we alight and visit these fields, wander leisurely up and down them, contemplate one by one each bed in turn. For a while we are in confusion, and so indiscriminating. The general loveliness of the flowers needs, indeed, no practised eye: but it is here as always where art and science are concerned, the niceties of distinction, the pleasure that comes to the connoisseur from his curious appreciation of these niceties, are not to be arrived at but gradually and with attention. As the connoisseur's sense steals over us, how alert grow our perceptions, into how charmed a circle we feel ourselves entering, full of strangely new interests and sensations! The very language of the scientist and his orderly divisions have something captivating about them; yielding to the spell, we would ourselves become students and cultivators. How superb are these blooms of the large BARRII CONSPICUUS with its rich yellow perianth, and its yet richer cup deeply edged with orange; or the STELLA SUPERBA, white and brilliant gold; or the INCOMPARABILIS GWYTHIER, soft sulphur and chrome; or the splendid yellow of the clustered heads of ODORUS RUGULOSUS! Let us leave these *Medio-coronati*, these Star Narcissi, and turn to the true Trumpet Daffodils, the *Magni-coronati*, of which some more imposing, but certainly no lovelier example may be found than the QUEEN OF SPAIN, the clear brilliant yellow hybrid from the exquisite little "ANGELS' TEARS," this a natural hybrid, too, let us remark, one of Mr. Peter Barr's many discoveries on the borders of Spain. Or is it showier blooms we hanker after? Then, take the majestic flower appropriately enough styled "EMPEROR," or the SANTA MARIA noticeable among them all for its elegantly twisted perianth.

But space fails us to name even the best of this splendid company. Year follows year and its numbers grow. But lately have been joined to it the large yet exquisitely delicate "MADAME DE GRAAFF," a very duchess in ivory satin tricked with pale gold; the brilliant yellow GLORIA MUNDI, its splendid chalice stained through to orange; and then, latest comer of all these, and to an initiate perhaps the most precious, the "APRICOT," its long straight trumpet just the delicious hue of the fruit that names it—the crown this, assuredly, of how many years' patient labour and thought, the strain of red brought at last to mingle with the natural yellow, and lo! a new colour springs to birth in this exhaustlessly delightful Daffodil land.

'Delightful indeed, for all its wealth of grace, and colour, and form, and subtle fragrance: delightful, too, these Daffodils for their timely appearance on the earth, and finally, let us say, for their hardihood. They ask from us no fanciful nurture amid strange heats and curious soils; they will flourish and blossom bravely under our northern, and too often reluctant, springs; nor in the open country only, but here even in our town dwellings, they will consent to unfold their charms for us not grudgingly.'

CULTURE AND ADAPTATION OF THE DAFFODIL OUTDOORS.

SOIL.—The Daffodil will thrive in any ordinary garden soil, but prefers a deep, rather moist loam. When the soil is of a dry sandy nature, it should be deeply dug, rotten stable manure should be added, and a potato or other crop be taken off before planting. If this is not convenient, then place the manure at least 12 inches deep, so as to be out of the reach of the bulbs; the manure is used not as a stimulant but as a sponge to hold moisture in the soil. The ammoniacal properties of manure are poison to the Daffodil, hence great care is necessary in the use of it.

FRESHLY DUG SOIL should be allowed to stand vacant two to three weeks before planting, to allow the ground to settle down, otherwise the freshly planted bulbs are often drawn under considerably below their proper depth, and the bloom in consequence is weakened and retarded.

BEST AND SAFEST MANURE TO USE is Crushed Bones or Basic Slag (for price see page 24). This should be applied at planting time, and may be mixed with the soil and placed next the bulbs; the Crushed Bones may be applied at the rate of 4 cwt. to the acre, or $1\frac{1}{2}$ oz. to the square yard, and Basic Slag may be applied in same manner at the rate of 1 ton to the acre, or $7\frac{1}{2}$ oz. to the square yard. *We recommend the Basic Slag in preference to the Crushed Bones, it being more reliable*, and a good manure for all lands; on very poor and DRY SANDY SOILS we recommend in addition SULPHATE OF POTASH (for price see page 24), to be sprinkled annually in the autumn over the surface of the ground, or after planting, at the rate of 2 cwt. to the acre, or about $\frac{3}{4}$ oz. to the square yard. The potash not only increases the depth of colour in the flowers, but also helps to hold the moisture in the soil, a condition so essential to the perfect development of the Daffodil.

IN EARLY SPRING, as soon as the Daffodils begin to show above ground, the surface soil should be well broken with a hoe, to sweeten it after the heavy winter rains.

PLANTING AND LIFTING.—The best time to plant to obtain the finest flowers is August and September, *although bulbs may be planted as late as Christmas with very satisfactory results*. They may be left undisturbed for three years in ordinary good loamy soils, but on poor and light soils they are better lifted every two years, as soon as the foliage has died down, and replanted as early as is convenient. Never plant when the ground is wet and sticky, wait until it is dry or friable. Do not put silver sand around the bulbs of Narcissi except in the case of *N. corbularia*.

DEPTH TO PLANT.—The average depth to plant is from 2 to 3 inches, that is to say, a covering of two to three inches of soil, but not more. As the bulbs vary considerably in size, according to the relative varieties, the best rule to go by is the bulb itself, which should be *covered with soil once and a half its own depth*, measuring the bulb from the collar of its neck to its actual base.

POSITION AND GROUPING FOR BEST EFFECT.—All Daffodils prefer partial shade, although most of them will grow equally well in the open. The varieties which are best grown in partial shade are indicated in the following pages by an *. In grouping in the flower border to obtain the best effect, they should be massed together in as large and as irregularly shaped groups as possible, avoiding straight lines or circular and symmetrical clumps. Masses of Daffodils should always appear in the Hardy Flower border, where irregular and effective sweeps can be planted between the clumps of herbaceous plants which in their turn grow up and hide as well as shelter the Daffodil foliage while it is going to rest. In grouping, the season of flowering should be borne in mind, as the varieties bloom in succession from the end of February to the end of May, during which period a constant succession of flower is obtainable by a judicious arrangement. In the following pages we denote the rotation of blooming. (See page 9.)

VARIETIES SPECIALLY SUITABLE FOR NATURALISING IN GRASS, WOODLANDS, &c. These are all free seeders, and will therefore spread naturally; they are mostly natural hybrids *Abcissus*, *Achilles*, *Countess of*

Annesley, Golden Spur, Henry Irving, Obvallaris, Sputius, Thomas Moore, English Lent Lily, Princeps, Scoticus, Variiformis, Albicans, Pallidus Præcox, Moschatus of Haworth (very pretty in grass), and Poeticus of the Pyrenees. THE VARIETIES UNDERLINED we do not recommend for the cultivated border, as they deteriorate the second year, while in grass or meadowland they flourish.

HINTS ON NATURALISING IN GRASS.—All daffodils may be planted in grass with perfect success. To produce the best effect the three groups should be kept separate: thus the Star Narcissi should not be mixed with the Great Trumpets, nor the Poet's Narcissi with the Star Narcissi. In arranging, make the breaks large and bold, scattering the bulbs over the ground broadcast with the hand, and dibbling into the ground where they fall. Avoid symmetrical lines or formal circles as far as possible, as these are never found in nature.

METHOD OF PLANTING IN GRASS.—Take a stout wooden dibber (like a potato dibber) with a strong tread; make the hole in the ground about six or seven inches deep, and fill up with a good mixture of prepared soil consisting of two-thirds loam and one-third old leaf soil; into this press the bulb, and cover up the hole with same compost; this will give the bulbs a fair start, and success is sure to follow. In planting under trees, avoid places where the drip from the branches is greatest, also where the main roots come close to the surface.

For price of Special Dibber, see page 24.

CULTURE INDOORS IN POTS, &c.

Of the stronger growing sorts use three to six bulbs, according to size of bulb for a 4½ to 6-in. pot; of the small growing kinds such as N. Minimus, Nanus, Minor, Cyclamineus, Triandrus, Juncifolius, and Corbularias use twelve to eighteen bulbs for a 4½ to 6-inch pot. These small-flowered dwarf-growing species are most charming in pots or little shallow pans. The following may easily be had in bloom in January—N. minimus, minor, nanus, and Cyclamineus, and these may be mingled with Chionodoxas, as both bloom at the same period and produce a charming contrast. The White Hoop Petticoat Narcissus should be potted in almost pure sand kept well moist, and may be had in bloom shortly after Christmas. (*See Rock Garden Collection of Daffodils, page 6.*)

If Daffodils are wanted in quantity for cutting early in the season, plant thickly in boxes five to six inches deep, and only just cover the bulbs with soil, using ordinary potting soil. The pots or boxes should then be placed out of doors on a firm bottom such as a bed of ashes or a gravel path and be covered with six inches of ashes or cocoa-nut fibre. When the bulbs have filled the pots or boxes with roots and made an inch or two of top growth, portions should be removed indoors in succession, selecting first those which flower naturally early. They should be first placed in a cold frame or cool greenhouse and then shifted to a slow forcing house when they should have abundance of water and plenty of air. The plants should be kept as near to the glass as possible, and not allowed to get drawn from an insufficient supply of light or air.

ON CUTTING DAFFODILS FOR DECORATION.

To obtain very fine blooms Daffodils should be cut in a young state, just when the bud has well broken and is expanding from the spathe. Place in water and allow the flowers to open in a cool greenhouse or sitting room. The blooms opened in this way are larger than those which develop out of doors.

DAFFODIL COLOURED PLATES.

These Daffodil Plates can be had, post-free, at the following charges—

- No. 1. A large Uncoloured Illustration, representing a Group of Yellow Trumpet Daffodils, drawn and arranged for the 'Gardener's Chronicle' by Agnes Barr. 6d.
- No. 3. Coloured Plate of Daffodils, representing *Incomparabilis Gloria Mundi, Incomparabilis Princess Mary*, and *Leedsii Beatrice*. 1s.
- No. 6. Coloured Plate of Daffodils, representing a Group of *Poeticus* and *Burbidgei* varieties. 1s.
- No. 7. Coloured Plate of a Group of Daffodils, including *Cernuus pulcher, Johnstoni Queen of Spain, Bicolor J. B. M. Camm, Leedsii Superbus, Nelsoni* varieties, &c. 1s.
- No. 8. Coloured Plate of a Group of Barr's Beautiful New Daffodil 'Queen of Spain.' 6d.
- No. 9. Coloured Plate of a Group of Daffodils, including *Barrii conspicuus, Triandrus albus, Leedsii Mrs. Langtry, Bicolor J. B. M. Camm, Johnstoni Queen of Spain, Cyclamineus major*, and *Minimus*. 1s.
- No. 10. Coloured Plate of Daffodil *Incomparabilis Sir Watkin*. 6d.

A COMPLETE SET OF THE ABOVE PLATES SENT, POST-PAID, FOR 4s. 6d.

'YE NARCISSUS or DAFFODYL.' By PETER BARR and F. W. BURBIDGE.

A few copies still remain of 'Ye Daffodyl,' price 1s. This is a record of the First Daffodil Conference, 1884, and contains a great deal of very interesting matter connected with the History and Literature of the Daffodil, with notes on culture and hybridisation; also, a complete descriptive list of all Daffodils, ancient and modern, known up to 1884.

SELECTIONS OF

Barr's Beautiful Daffodils

FOR AMATEURS.

BARR'S Popular 24/- Collection of High Class DAFFODILS,

Consisting of the following fine distinct varieties, selected from Groups I., II., and III., and suitable either for pot-culture or for the flower border.

PEERLESS DAFFODILS, or CHALICE-CUPPED STAR NARCISSI, MIXED
(*Incomparabilis*, *Barril*, and *Leedsii* varieties) for naturalisation in grass, &c. The grand effect of these light graceful Daffodils must be seen to be realised as naturalised plants. Their value as cut flowers for bouquets and vases cannot be over-estimated. *Mr. William Robinson has made a great feature of these at Gravetye Manor, East Grinstead*per 1000, 35/-; per 100, 4/-.

TRUMPET DAFFODILS, MIXED, including *Princeps*, *Abcissus*, *Spurius*, *Rugilobus*, *Lent Lily*, *Telamonius plenus*, &c., for naturalisation, per 1000, 42/-; per 100, 5/-.

POET'S DAFFODILS, or SMALL-CUPPED STAR NARCISSI, IN MIXTURE,
including early flowering *Poeticus* and varieties of *Burbidgei*, for naturalisation in grass, &c.
For cutting, the flowers are greatly prized. Of these *Poet's Narcissi* Mr. William Robinson writes,
referring to *Gravetye*: 'Five years ago I cleared a little valley of various fences. Through this runs
a streamlet, and we grouped the *Poet's Narcissus* near it, and in a little orchard that lay near, and
through a grove of oaks. This year the whole landscape was a picture, such as one might see in an
Alpine valley'.....per 1000, 42,-; per 100, 5,-.

The following are charming little subjects for rockwork, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and, if happy, will soon establish themselves and afford a lovely picture in early spring. All the *Corbularius* (except *Corbularia monophylla*) like moisture, and should therefore be planted at the foot of the rockery. *Cyclaminus* also likes moisture and partial shade. *Corbularia monophylla* flourishes in a warm dry sheltered situation, and should be given a hot sunny nook, planted in almost pure sand; when coming into bloom give water freely. *Triandrus albus* (*Angel's Tears*) delights in shade and gritty soil. We recommend, in the case of these slender dwarf-growing Miniature Daffodils, carpeting the ground with close-growing surface rooting plants, such as *Thymus serpyllum* var. *T. lanuginosus*, *Herniaria glabra*, Mossy *Saxifragas*, &c.; these plants provide a natural protection for these little bulbs, besides keeping their dainty blooms from being splashed and soiled in rainy weather.

Beautiful New Daffodils for 1899.

Including the Rev. G. H. Engleheart's Famous Seedlings.

We have pleasure in stating that we have acquired the complete stock of several of the more beautiful hybrid Narcissi raised by the Rev. G. H. Engleheart, and are now in the position to offer a few to the public. The new seedlings offered below are all of good robust constitution. We also offer a few other fine new seedlings, including the DUKE OF BEDFORD, the largest trumpet Daffodil yet introduced. In italics we give the name of the introducer.

| | |
|--|-----------------------|
| ALMIRA (Poëticus) , a beautiful Poet's Narcissus, with broad rounded white perianth of fine substance, and cup margined deep red | each |
|per doz. 7s. 6d. | 8d. |
| CASSANDRA (Poëticus) (<i>Engleheart</i>), a noble and gigantic Poet's Narcissus of tall and vigorous growth; flowers of fine substance, with broad wide-spreading clear white perianth, cup deeply-rimmed dark red. <i>Award of Merit R.H.S.</i> | £3. 3s. |
| CECILY HILL (Barrii) (<i>Backhouse</i>), a beautiful flower, with fine stiff perianth of a soft primrose flushed yellow at base, cup yellow flushed orange-red, and edged cinnabar-red, late-flowering..... | 10s. 6d. |
| CHAUCER (Poëticus) (<i>Engleheart</i>), a large and beautiful Poet's Narcissus, petals broad, with large flat cup of a striking intense crimson colour; flowering in the period between <i>N. Poëticus ornatus</i> and <i>N. Poëticus poetarum</i> | £5. 5s. |
| DR. FELL (Barrii) (<i>Backhouse</i>), perianth whitish, cup orange-scarlet, a valuable acquisition for pot-culture under glass, being very early flowering. It is not suitable for the border, the flower-buds being so early are liable to suffer from frost. Very showy variety when forced | 1s. 3d. |
| DUKE OF BEDFORD (Bicolor) (<i>Barr & Sons</i>), the largest trumpet Daffodil yet introduced, and a magnificent flower, measuring 4½ inches across; perianth pure white, broad and of great size, trumpet clear soft yellow, very large and of fine substance and form, measuring 2½ inches across at the mouth; it flowers very early, opening before <i>Horsfieldii</i> . <i>Awarded</i> , during Spring, 1899, <i>First-Class Certificate</i> , Birmingham; <i>First-Class Certificate</i> , Edinburgh; <i>First-Class Certificate</i> , Wisbech; <i>Award of Merit R.H.S.</i> | £12. 12s. |
| HILLSIDE DAFFODIL , a handsome rich golden-yellow early flowering Daffodil, with large broadly-expanded trumpet gaufered at mouth..... | 10s. 6d. |
| LADY OF THE LAKE (Poëticus) (<i>Engleheart</i>), a most beautiful Poet's Narcissus, with large bold flowers of perfect symmetry, the pure white perianth being broad and circular in form; very free-flowering and coming in with <i>Poëticus ornatus</i> or just afterwards | £2. 2s. |
| LADY WILLES , perianth primrose-yellow, bold yellow trumpet deeply flanged and open at mouth; a strong and rather dwarf growing new Trumpet Daffodil | 5s. 6a |
| MAGGIE MAY (<i>syn. Edmond's White</i>), the most beautiful Daffodil of the <i>Leedsii</i> section yet raised, flowers of great size, with broad spreading white perianth and very large pale citron cup beautifully frilled; a fine strong grower. <i>First Class Certificate R.H.S.</i> ; <i>First Class Certificate</i> , Birmingham .. | £18. 18s. |
| RAY SMITH (<i>Barr & Sons</i>), a uniform rich yellow trumpet Daffodil, distinct and elegant in form, perianth gracefully twisted and tapering to a point; a strong grower with broad deep glaucous foliage | 7s. 6d. |
| RED COAT (Incomparabilis) (<i>Backhouse</i>), a remarkable variety, having an orange glow in the yellow perianth, cup orange-red, crenulated at brim; this is the first sign of a break of orange-red in the perianth of any seedling yet raised..... | 10s. 6d. |
| SENTINEL (Bicolor) (<i>Barr & Sons</i>), broad erect spreading perianth of a pure white, with short clear yellow trumpet, expanded and flanged at mouth, strong grower, flowers just topping the foliage, a very effective and desirable variety | 4s. 6d. |
| STELLA superba (Incomparabilis) , a grand bold flower, far superior to <i>Incomparabilis Stella</i> , flowers more than twice the size, with large clear white spreading perianth and a showy yellow cup; it is a strong grower and excellent for cutting, having a long stem. (<i>See illustration, page 17</i>) | per doz. 9/- 10d. |
| THE TWINS (Tridymus) (<i>Barr & Sons</i>), a pretty two-flowered variety, perianth creamy white, bold rich yellow cup of fine substance, violet-scented; a good grower of robust habit | £1. 10s. |
| UNA (Leedsii) (<i>Engleheart</i>), a flower of exquisite beauty and might be described as a glorified <i>Duchess of Westminster</i> , perianth creamy white, very large and spreading, crown long and straight, of a bright citron tinged apricot; very vigorous grower | £12. 12s. |
| WILLIE BARR , a handsome Trumpet Daffodil, perianth clear soft yellow of fine campanulate form and good substance, trumpet rich deep yellow with elegant brim; strong sturdy grower | per doz. 36/- 3s. 6d. |

1 Bulb each of the above-named 17 handsome New Daffodils for 1899, £55.

Reproduced from Photograph taken at Barr & Sons' Nurseries. (Copyright.)

Narcissus bicolor J. B. M. Camm.

A very chaste and beautiful Trumpet Daffodil, of fine outline and very delicate colouring; perianth white, trumpet soft pale chrome-yellow. (*See page 12.*)

General List of Barr's Daffodils.

The following list of Daffodils embraces the highest class, and most distinct varieties, surpassing in beauty and diversity all other assortments offered to the public. They represent the cream of our Collection (over 500 kinds), and include the pick of all the newest varieties up to 1899, many of which are offered to the public for the first time this season. Within the last few years we have discarded many of the older kinds which we considered had been superseded by better sorts, so that all the varieties offered by us are good and distinct.

THE ORDER OF TIME OF FLOWERING.

The relative period of flowering of the different varieties and species we have denoted by means of numbers after the names, thus :

- (1) 1st early, flowering from February to early March.
- (2) 2nd early, flowering in March.
- (3) Varieties flowering in mid-season, or early in April.
- (4) Late-flowering varieties, from middle to end of April.
- (5) Very late-flowering varieties, opening in May.

The actual period of blooming depends upon the season and district; thus in early districts (1) would commence in January and early February, while in colder districts end of February or beginning of March; but the natural rotation would remain the same.

FOR ALPHABETICAL INDEX of all the varieties offered in the following list, *see page 2 of Cover.*

☞ The varieties marked thus * thrive best under the shade of deciduous trees, naturalised in grass in shady nooks, or on grassy slopes facing north.

THE ILLUSTRATIONS we give are from Photographs taken at our Daffodil Nurseries, and are intended principally to give a general idea of the form of the flower.

DAFFODILS.—GROUP I.—MAGNI-CORONATI (Baker).

AJAX of Salisbury, Haworth, and Herbert, PSEUDO-NARCISSUS of Parkinson.

THE LARGE-CROWNED OR TRUMPET DAFFODILS, INCLUDING ALSO THE HOOP-PETTICOAT
OR MEDUSA'S TRUMPET DAFFODILS (*CORBULARIA* OR *BULBOCODIUM*).

DISTINGUISHING CHARACTER.—Crown or Trumpet as long or rather longer than the perianth segments.

NARCISSUS CORBULARIA (BULBOCODIUM).

The Hoop-Petticoat, or Medusa's Trumpet Daffodils.

For rockwork, edgings and small beds, these beautiful little Daffodils are most charming, while if several bulbs are planted in pots or pans, they are greatly prized for indoor decoration. See *Cultural Notes*, pp. 3 & 4.

| JOHN NELSON (3), a very distinct large rounded drooping flower, almost uniform yellow, rather dwarf. (See illustration in our 1898 Catalogue) | 24 | 0...2 | 3 |
| *JOHNSTONI (Type) (2), a distinct beautiful variety, perianth and trumpet clear soft sulphur colour. Grow in partial shade or grass. (All the <i>Johnstoni Daffodils</i> are natural hybrids of <i>N. Ajax</i> and <i>N. triandrus</i> . Charming as buttonhole flowers)..... | ... | 2 | 6 |
| *JOHNSTONI QUEEN OF SPAIN (2), found by Mr. Peter Barr in Spain. One of the most beautiful, distinct and graceful Daffodils in cultivation, and for bedding unsurpassed. The flowers, which barely rise above the foliage, are of a uniform soft delicate clear yellow, with a gracefully reflexing perianth and straight trumpet of distinct and elegant form; the flowers vary slightly in size, and a few <i>King of Spain</i> may be found amongst them, as in their native habitat the two grow together. Awarded Floral Certificate at the Daffodil Conference, 1896. Visitors to the Royal Botanic Gardens, Regent's Park, during the Spring of 1896, 1897, 1898, and 1899 have been charmed with the effect produced by large masses of this beautiful Daffodil, naturalised in grass beneath the trees. (See Illustration, page 1)1st size bulbs, per 100, 17/6 | 2 | 6...0 | 3 |
| 2nd size bulbs, for large plantings to naturalise, " " 14/6 | 2 | 0...11 | 6 |
| *JOHNSTONI KING OF SPAIN (2), found by Mr. Peter Barr in Spain. This very beautiful Daffodil differs from <i>Queen of Spain</i> in the trumpet being generally shorter, wider, and spreading at the mouth instead of being straight; it is a flower of most charming elegant form and the admiration of all who have seen it ...per 100, 30/- | 4 | 6...10 | 6 |

| VICTORIA , new 1897 (4), a grand new Trumpet Daffodil, exhibited by us for the first time, 1897, and highly appreciated by all. The Daffodil Committee of the R.H.S. gave it an <i>Award of Merit</i> , April 27, 1897, and the Royal Botanic Society awarded it a <i>Certificate of Merit</i> , March 30, 1897. The flowers are large, bold and erect, with creamy white perianth of remarkable breadth and good quality; the trumpet is a clear rich yellow, large, broad and of great substance, beautifully flanged and flilled at mouth. When flowered under glass the perianth is of a snowy whiteness; for pot-work it is the king of daffodils. It is a very free strong grower. (<i>See Illustration in our 1898 Catalogue</i>) | 36 0..3 6 | | |
| WEARDALE PERFECTION (4), the largest and grandest of all Daffodils, large white perianth, immense bold trumpet, very pale primrose. Awarded 1st Class Certificate by the R.H.S. 1894, and the Premier Prize as being the 'Finest Daffodil' at the Birmingham Narcissus Show, 1894, and Floral Certificate at the Daffodil Conference, 1896. (<i>See Illustrations in the 'Journal of Horticulture,' April 21st, 1898</i>).....each, £10 10s. | | | |

TRUMPET DAFFODILS. White and Sulphur-coloured Varieties.

Most of the Daffodils in this section thrive best in fibrous virgin loam, mixed with well-decayed leaf-soil; generally speaking they dislike manure; where, however, the soil is very poor, bone-meal or basic slag may be used (for full directions, see page 3).
*The varieties marked thus * require shade: they all prefer a north-west aspect.*

| | | | |

DAFFODILS.—GROUP II.—MEDIO-CORONATI (of Baker).

The Chalice-Cupped Daffodils or Star Narcissi.

QUELTIA, PHILLYGNE, GANYMEDES, &C., OF SALISBURY, HAWORTH, AND HERBERT;
PEERLESS, NONSUCH, &C., OF PARKINSON.

The varieties of this group are hybrids, excepting *Triandrus* and *Juncifolius*, which are species. *Incomparabilis* and *Barrit* are the result of garden crosses between yellow Trumpet Daffodils and *Narcissus* *Poeticus*; *Leedsii*, a garden cross between White Trumpet Daffodils and *Poeticus*; *Backhousei*, *Nelsoni* and *Macleanii*, the result of a Trumpet Bicolor var. crossed with *Poeticus*; *Bernardi*, a natural cross between *Abcissus* (trumpet) Daffodil and *Poeticus*; *Tridymus* is a garden hybrid between a Trumpet Daffodil and a *Tazetta* or *Polyanthus* *Narcissus*; *Odorus*, a natural hybrid between a Trumpet Daffodil and *Narcissus* *Jonquilla*; *Biflorus* is the result of a natural cross between *Narcissus* *Tazetta* and *Poeticus*.

The varieties in this group commence flowering in March, and furnish a succession till May. They are all of elegant beauty, and as cut flowers, are extensively used for furnishing vases and table bouquets. For this purpose they should be grown in quantity in boxes and forced for early bloom (see page 4).

☞ The varieties marked thus* are not suitable for all cultivated borders, but thrive best under the shade of deciduous trees such as fruit trees, &c., naturalised in grass in shady nooks, or on grassy slopes facing north or north-west.

NARCISSUS INCOMPARABILIS.

DISTINGUISHING CHARACTER.—Crown or cup half as long as the perianth segments, but in one or two cases three-quarters as long.

The Chalice-Cupped Daffodils or Star Narcissi.

All these make charming pot-plants, while the cut flowers are of great value in decoration. For beds and borders they are very showy, and naturalised in grass few flowers are so graceful and effective.

NARCISSUS INCOMPARABILIS (DOUBLE).

The Double-flowered Nonsuch and Peerless Daffodils.

The large massive flowers of these are greatly prized for bouquets and vases, mixing well with other flowers and foliage in decoration. As pot plants (three to six bulbs in a pot) they are very charming, while in beds, borders, or naturalised, they make a most effective display.

| INCOMPARABILIS PLENUS 'BUTTER AND EGGS' (2), large double yellow rose-shaped flowers, orange-coloured towards the centre, very effective in clumps and masses | | per doz. | | each. | |

| INCOMPARABILIS PLENUS 'CODLINS AND CREAM' (<i>syn. Sulphur Phoenix</i>) (3), large double pure white rose-shaped flowers with sulphur centre, very chaste and much prized for bouquets, vases, &c., <i>extra fine</i> | per 100, 35/- | 5 | 0... | 0 | 6 |

Reproduced from Photograph taken at Barr & Sons' Nurseries. (Copyright.)

Narcissus Incomparabilis Stella superba.

A grand bold flower, twice the size of *stella*, and with large clear white spreading perianth and showy yellow cup ; it is a strong grower and excellent for cutting, having a good long stem. (See *Novelties*, page 7.)

Reproduced from Photograph taken at Barr & Sons' Nurseries. (Copyright.)

Narcissus Leedsii Duchess of Westminster.

One of the most handsome varieties of the *Leedsii* section ; large white perianth and long soft canary cup, tinged orange on first expanding, the whole flower passing off white : of very robust constitution. *1st Class Certificate R.H.S.* (See page 19.)

NARCISSUS BARRII.

DISTINGUISHING CHARACTER.—Perianth segments twice or more the length of the short expanded cup or crown.

Star Narcissi with Shortened Chalice Cup.

The beauty of these Narcissi renders them of great value for indoor decoration (3 or 5 bulbs in a 5-inch pot), while for beds, borders, naturalisation, and as cut flowers they are very highly prized.

CECILY HILL. See *New Daffodils*, page 7.

CONSPICUOUS (4), a flower of great beauty and refinement, and a favourite with all, large broad spreading yellow perianth, broad short cup, conspicuously edged bright orange-scarlet, *extra fine*, 1st Class Certificate, R.H.S. We can highly recommend this variety to every one as it is certainly the Queen of Daffodils, and lasts longer in water when cut than almost any other variety; it is a robust strong grower and a very free bloomer. (See *Illustration in our 1898 Catalogue*)

NARCISSUS LEEDSII.

The Silver Star Narcissi, or the Eucharis-flowered Fragrant White Daffodils.

DISTINGUISHING CHARACTER.—Shape of flowers resembling *N. incomparabilis* and *N. Barrii* Settlons, but differing in the colour of the cup or crown, which is either pure white or of a pale lemon shade passing off white.

These chaste and beautiful Daffodils are highly prized for indoor decoration, while to cut for bouquets their fragrant flowers are greatly in demand. Plant 3 or 5 bulbs in a 5-inch pot. In flower beds and borders, and naturalised, they are most charming.

NARCISSUS TRIDYMUS.—Three-Crowned Daffodils.

A very distinct and interesting section, being garden hybrids between the Trumpet Daffodil and the Tazetta or Bunch-flowered Narcissus, generally bearing more than one flower on a stem.

| | | | |
|--|-----|------|---|
| A. RAWSON (4), large bold imbricated soft clear yellow perianth, rich full yellow cup, very handsome, <i>extra fine</i>per 100, 3/- | ... | 3 | 6 |
| MISS WHITE, new 1898 (3), each stem bearing three to four elegant silvery white flowersper 100, 7/- | ... | 7 | 6 |
| S. A. DE GRAAFF (3), large bold well-imbricated yellow perianth, yellow cupper 100, 25/- | 3 | 6..0 | 4 |

NARCISSUS TRIANDRUS (syn. Ganymedes).**The White Cyclamen-flowered Daffodil.**

This dainty little 'ANGEL'S TEARS' Daffodil was found by our Mr. Peter Barr on the mountains of Portugal and Spain, growing in very hard, firm, fine gritty soil, sometimes in the narrowest fissures of granite and slatestone rocks. They are veritable gems when grown in pots (see page 4), while on rockwork they form a picture full of grace and beauty. They all prefer shade, a gritty soil, and well drained position.

| | | | |
|--|-----|------|-----|
| ALBUS (3), an exquisitely beautiful little flower, appropriately called the 'Angel's Tears' Daffodil, flowers white, variable in size, perianth elegantly reflexed. (See <i>Illustration in our 1898 Catalogue</i>)per 100, 8/6 | 1 | 3.. | ... |
| Larger size Bulbs. per 100, 10/6 | 1 | 6..0 | 2 |
| CALATHINUS (3), beautiful snowy white flowers, much larger and quite distinct from <i>Triandrus albus</i> , <i>extra fine</i> . This very rare little Daffodil was collected some years ago, by Mr. Peter Barr, on the 'Glennans,' the collecting being attended with a good deal of risk. After that, for a few years we failed to procure any, but in 1897 we were fortunate in getting a limited quantity—the last we fear for some years to come. We therefore recommend purchasers to take every care of this lovely and rare flower. (See <i>Illustration on front cover</i>)per 100, 0..1 | 12 | 0..1 | 3 |
| CONCOLOR (3), uniform soft yellow, rare and beautifulper 100, 6..1 | 10 | 6..1 | 0 |
| PULCHELLUS (4), perianth primrose, cup white, rare and beautifulper 100, 5/- | ... | 5 | 6 |

N. Cyclamineus (page 10), *N. Johnstoni* Queen of Spain (page 10), and *N. Triandrus* varieties, are the only Daffodils with reflexed petals.

NARCISSUS ODORUS (*syn.* Philogyne).**Fragrant Giant Jonquil-Daffodils.**

Very graceful, grown 6 in a pot, for indoor decoration, and charming in beds, borders, and naturalised on grassy slopes, &c., valuable flowers for cutting. Grown by the waterside, the *Narcissus odorus* varieties look charming, with their rush-like foliage and profusion of deliciously scented brilliant golden flowers.

ODORUS (Campernelle Jonquil) (2), perianth and cup full yellow, several flowers on a stem.....per 1000, 25/-; per 100, 3/- per doz. each
s. d. s. d.
0 6... ..

***HEMINALIS** (3), rich golden-yellow, with long handsome cup, delightfully fragrant, very distinct and rare. (We believe this to be the single form of *Odorus plenus*) per 100, 18/6 2 6...0 3

RUGULOSUS (true) (2), rich yellow, broad imbricated perianth and straight wrinkled cup, a most charming showy variety, valuable for bedding, per 1000, 35/-; per 100, 4/6 0 8... ..

NARCISSUS ODORUS PLENUS.**Queen Anne's Sweet-scented Double Jonquil.**

This beautiful sweet-scented rose-like Double Daffodil makes a charming pot-plant, 5 or 6 bulbs in a pot, and is beautiful in beds, borders, and naturalised in grass, &c.

***ODORUS PLENUS** (2), handsome rich full yellow flowers, resembling a small perfectly double yellow rose, *extra fine*, prefers shade 8 6...0 9

NARCISSUS JUNCIFOLIUS.**The Miniature Rush-leaved Daffodil.**

A charming and elegant little species for pots (*see page 4*) or for select spots on rockwork.

JUNCIFOLIUS (4), a slender-growing dwarf species, with small graceful rich yellow flowers, about the size of a buttercup, with a perfectly flat little crown, height 3 to 4 inches, flowers delicately fragrant, a native of the Pyreneesper 100, 6/6 1 0... ..

DAFFODILS.—GROUP III.—PARYI-CORONATI (Baker).**THE SMALL-CROWNED DAFFODIL or TRUE NARCISSUS.**

DISTINGUISHING CHARACTER.—Crown less than half as long as the divisions of the perianth.

In this series, *Poeticus* (the Poet's Daffodil) is the flower popularly called the *Narcissus*; *Burbidgei* is a hybrid between *Incomparabilis* and *Poeticus*, and is the connecting link between Groups II. and III. *Biflorus* is Parkinson's Primrose-Peerless, a hybrid of *Tazetta* and *Poeticus*. *Gracilis* and *Tenutor* are the Helena of Haworth; *Jonquil* the Jonquilla of Linnaeus; *Polyanthus Narcissus*, the Hermione of Haworth and *Tazetta* of Sibthorp.

NARCISSUS BURBIDGEI.**Hybrid Poet's Daffodils or Star Narcissi.**

These with their light and graceful habit and beautiful blossoms are much valued as pot-plants (3 to 6 in a pot), and for vases, bouquets, and buttonholes; in beds and borders they are specially attractive, while naturalised in grass few plants are so beautiful.

The *Burbidgei* Narcissi differ from *N. Poeticus* in the cup of the flower being a trifle longer; the early forms commence flowering before *Poeticus ornatus*, and continue flowering in succession, one variety after another, from March to the middle of May.

BURBIDGEI (3), perianth clear white, cup margined with cinnabar-red, *very early*, and much prized for cuttingper 1000, 25/-; per 100, 3/- per doz. each

NARCISSUS POËTICUS.

The Purple-ringed Poet's Daffodil or Star Narcissus.

Poëticus divides naturally into *early* and *late*-flowering varieties. It is from the early section, especially *Poëticus ornatus*, that Covent Garden is supplied with forced cut flowers from January to March.

Referring to the great beauty of these Poet's Daffodils when naturalised, Mr. William Robinson writes: 'Four years ago I cleared a little valley of various fences. Through this runs a streamlet, and we grouped the Poet's Narcissi near it, also in a little orchard that lay near, and through a grove of oaks. This year the whole landscape was a picture such as one might see in an Alpine valley.'

March and April Early-flowering Section.

Very beautiful for indoors, 5 bulbs in a 4- or 5-inch pot. Charming in beds and borders, while naturalised in grass, they present in spring a most lovely sight.

| FOËTICUS ORNATUS (4), perianth pure white, broad and well formed, cup | per doz. | each |
|---|---------------|-------|
| margined with scarlet, <i>very early</i> , <i>extra fine</i> ; a valuable Narcissus | s. d. | s. d. |

Special Notices.

Orders.

We shall esteem it a favour if our Customers will kindly use the Order Sheet that accompanies this Catalogue, and be particular to fill in the full postal and rail address, as sometimes Orders reach us without either name or address, and it is impossible to trace the senders.

Free Carriage of Bulbs.

All **Prepaid Orders** for Bulbs, over 5s. in value, will be sent **Carriage Paid**. Orders not prepaid, if over 10s. in value, carriage may be deducted at settlement of account.

Prepaid Orders.

Besides sending **Prepaid Orders** 'Carriage Paid,' we allow **1s. in the £**, which may either be deducted by the Customer when remitting, or if this is not done, a liberal equivalent in goods will be added to the Order.

Cash Discount 5 per cent.

1s. in the £ discount may be deducted from all accounts when paid within 14 days from date of invoice. Accounts due nett Christmas and Midsummer.

Remittances.

Money Orders and Postal Orders to be made payable at Covent Garden Post Office; these and all Cheques should be crossed 'London and County Bank.' Small amounts may be remitted in Postage Stamps or Coin, in a Registered Letter.

Packages.

Boxes, Bags, &c., are charged at cost price, but these may be deducted from our account if returned Carriage Paid within a fortnight. *Returned empties should have the sender's name on the address label for identification, and a notification should be sent by post, stating date of despatch and name of Railway Company.*

Catalogues.

Our **Seed Guide**, containing a full descriptive list of our matchless Flower and Vegetable Seeds, is published in January, **Spring Bulb Catalogue** in January, **Hardy Plant Catalogue** in February, **Daffodil and General Bulb Catalogues** in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Daffodil Notices.

Our Nurseries, Long Ditton.

Visitors invited during Spring to see our magnificent Collection of Daffodils in bloom. The Nurseries are easily reached by the London and South-Western Railway to **Surbiton Station**, and from thence 1/- cab fare to the 'Pound Farm' entrance to our Nursery.

Cut Daffodil Flowers.

When in bloom out-of-doors, cut specimens of Daffodils, correctly named, we forward post-paid at a moderate charge, to cover attendant expenses, thus offering a good opportunity to those who wish to extend their knowledge of these lovely flowers of Spring. If a list of the varieties possessed by the sender is enclosed, such sorts will be omitted. *A remittance should accompany the order.*

1 flower each of 12 sorts, 1/6; 1 each of 25 sorts, 3/6; 1 each of 50 sorts, 6/-
3 flowers ,, 12 ,, 3/-; 3 ,, 25 ,, 5/6; 3 ,, 50 ,, 10/6

Cut Daffodil flowers (without names) in variety, for decoration,
4/6, 5/6, & 7/6 per 100.

Naming Daffodils.

Cut specimens of Daffodils we undertake to name correctly, at the charge of 4d. each, 2s. per dozen, to cover attendant expenses. Address all cut specimens to be named, accompanied by a remittance, to our Nurseries, Long Ditton, Surrey.

Daffodil Prizes.

Particulars of **Competitions, Spring 1900**, for Barr's Silver Daffodil Cups, will be sent on application.

Notices to Our Foreign and Colonial Correspondents.

Prepayment necessary.

Owing to the difficulty of collecting accounts abroad, we beg that Customers will kindly enclose with their Orders *a remittance, a draft, or an 'order to pay'* on a London Bank, or Agent; the remittance should be sufficient to cover cost of carriage when the freight is required to be paid in advance.

Particulars of Freight.

India.--Seeds and Bulbs can be despatched to all postal towns in India, by Parcel Post, at the rate of 1 lb. for 1s., and after the first lb. 8d. per lb. up to 11 lbs., or by 'Eastern Express,' at 6d. per lb. up to 30 lbs., after 30 lbs. cheaper as cargo.

Australia and New Zealand, per 'Eastern Express,' at 6d. per lb. (minimum 2s.) or per Parcel Post at 6d. per lb. (1s. being charged for the first lb.). We recommend the **Parcel Post** to be used where possible, parcels thus sent being delivered at the Customer's house quicker, and without any additional charges.

Shipping, &c.

In **Shipping Bulbs and Plants** to India, Australia, New Zealand, America, and the Cape, we exercise great care in selecting, preparing, and properly packing the same. Still there are so many contingencies that we cannot, in any way, hold ourselves responsible for the condition in which Plants or Bulbs reach their destination. *Our Customers will confer a favour if they report, on arrival, the condition of the goods.* Our experience in *successfully preparing and shipping Seeds, Bulbs, and Plants* to India and the Colonies extends over a long period.
